

AMENDMENTS TO THE SPECIFICATION

Please replace the paragraph that begins on page 18, line 15 with the following rewritten paragraph:

A hybrid circuit [[96]] 98 separates transmission system signals from reception system signals, and sends a transmitting signal from an adder circuit 912 to the telephone line 92a by way of the NCU 92. In addition, it receives a signal from the other end by way of the NCU 92, and sends it to a demodulation unit 98 by way of a signal line 96a.

Please replace the paragraph that begins on page 22, line 20 with the following rewritten paragraph:

It determines whether or not the received e-mail address is registered with the applicable memory shown in FIG. 10 in a step S1316, and it proceeds to the step S1316 S1320 if registered, and it proceeds to a step S1318 to erase memory-received information from the memory if not registered.
